

EAGLE VALLEY NATURAL GAS PLANT

Indianapolis Power & Light Company (IPL) is building a new natural-gas Combined-Cycle Gas Turbine (CCGT) as part of a more balanced generation mix. This new plant will be highly reliable, and will generate cleaner and more efficient energy at a reasonable cost to our customers.

Highly efficient
671 MW
natural gas-fired
combined cycle
power plant

Capacity to power
370,000
homes

\$48 Million
annual impact to
local economy

\$851 Million
contributed to local
economy during
construction

Nearly
98%
reduction in key
emission rates*

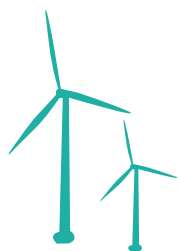

97% Less
fresh water used*

BALANCED
power generation
portfolio**

One of the **Most**
Fuel-Efficient
thermal plants in Indiana

Enables integration of
Renewable
energy

* Compared to units it is replacing
