

Ways
to
Save

For Your Business

Prescriptive HVAC Rebates

Equip your business for success with HVAC upgrades.

Control costs and save energy with Indianapolis Power & Light Company's (IPL) Prescriptive Rebates Program. IPL helps your business find more ways to save by offering rebates that make long-term energy-saving HVAC projects more affordable.

REBATES FOR YOUR HVAC SYSTEM

High Efficiency Pumps

Up to
\$300/unit

Up to
\$350/ton

Variable Frequency Drives
(up to 75 hp- use prescriptive application, greater than 75 hp- apply through the custom program)

\$60/hp

High Efficiency Water Cooled and Air Cooled Chillers

Up to
\$50/ton

Programmable Thermostats

\$50/unit

Guest room Energy Management Controls (retrofit only)

Up to
\$80/room

Signs it's time TO MAKE A CHANGE

Energy bills are on the rise

- If you maintain your unit, but costs are increasing, it may be time to replace your unit with a newer model.

Rooms are too hot or too cold

- Poorly installed or insufficient systems may be the cause of uncomfortable spaces.

Repetitive repairs

- Equipment breaks down more frequently in the last two years of its life.

Aging equipment

- The typical lifespan of an air conditioner or furnace is 15 years. Consider replacing old, inefficient equipment when it reaches the end of its life.

Your thermostat is always set to one temperature.

- You may save up to \$180 per year¹ in energy costs when you use a programmable thermostat to control temperatures based on your facility's occupancy schedule.

¹energystar.gov

HVAC equipment is the largest single energy user in a building

Because HVAC can account for 40 percent of a commercial building's electricity use,² making simple heating and cooling improvements can easily reduce your energy consumption.
